WORK EXPERIENCE

AI / ML Intern — REGex Software Services

AI / ML Intern — REGex Software Services

2025

- Worked on Generative AI and ML projects using Python and Scikit-learn.
- Built ML pipelines including preprocessing, feature engineering, and evaluation.
- Assisted in AWS deployment and Linux server management.

EDUCATION

B.Tech – Artificial Intelligence - 9.00 GPA

2023 – 2027 (Expected)

- B.K. Birla Institute of Engineering and Technology, Pilani, Rajasthan

PROJECTS

AI Interview Assistant (GenAI + Voice AI)

- Developed an AI-powered interview assistant with resume analysis, voice interaction, and real-time interview feedback.
- Integrated Speech-to-Text, NLP pipelines, and LLM-based response evaluation using Python and OpenAI APIs.
- Deployed the application on AWS with scalable backend services and conversational memory support.
- Implemented emotion detection and anti-cheating monitoring features for intelligent interview assessment.

AI Audio Conversational Chatbot

- Built a real-time conversational AI chatbot using Python, Speech-to-Text, and NLP pipelines.
- Deployed on AWS EC2 with S3 and RDS/Aurora integration for scalable conversation storage.
- Managed Linux deployment, SSH access, and GitHub-based CI workflow.

Intelligent AI Travel Agent

- Developed an AI travel assistant with booking recommendations and dynamic pricing.
- Built Python backend and integrated AWS RDS for persistent storage.
- Integrated recommendation algorithms and real-time travel insights to personalize trip planning and improve user experience.

SKILLS

- Languages: Python, SQL
- AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, TensorFlow, PyTorch, Scikit-learn
- Cloud & Tools: AWS (EC2, S3, RDS), Git, GitHub, Linux, Docker, VS Code
- Libraries: Pandas, NumPy, Matplotlib, LangChain
